

## some friendly tips to help you on your big day

- \* The first thing to put in your head is that you must have fun on your wedding day. Forget about minor problems or insignificant details. Enjoy each moment of your day. So, laugh a lot, make funny expressions and be playful. Even if the two of you need a glass or two of champagne to relax. Don't forget, it's a day to really be happy and to celebrate.
- \* Brides – do your best to only be fashionably late ie. 5 to 10 minutes. Time is always made up by taking away photo time and you will miss out on our awesome creative shoot
- \* If you feeling self-conscious you may be inclined to shrink into yourself. Slouching won't do you any favours, so try to rock the good posture for great photos!
- \* Wedding photographers love couples who interact with each other. What instantly makes a wedding picture more appealing are couples that look at each other, that smile at each other and that show off their feelings and love.
- \* make a list of who you would like in your group photos & break it into the various groups, this not only saves time but you don't leave anyone out ! oops, we forgot granny !!
- \* if we go to the beach – take a towel and 2 litre water bottle to wash your tootsies afterwards.
- \* don't make the room too dark for the opening dance – the video and photos don't come out as cool as with a bit of light, nothing crazy just a bit.
- \* get the cake, garter & dance photos done as soon as you can – you not constantly .wondering what's next and can get on with the party party party !!
- \* if it's winter and we have minimum daylight, save all the chitchat for the reception and not outside the church – let's go go go !!!
- \* Don't overuse the sunbed! Sunbed tans tend to be yellow and over doing it will ruin your photos!
- \* One of the best things you can do to insure great photos is simply to relax and have a good time – don't stress, all will be fine – promise !
